RE: Wells G & H Site, Woburn, Massachusetts  
Northeast Quadrant Ground-Water Remedial Action  
EPC Reference # 9201/122

Dear Barbara:

Enclosed with this letter are comments provided by EPC, ENSR and GeoTrans on your minutes of the February 18, 1992 technical review meeting. As you recall, this meeting involved a discussion of EPA's comments on Volume I of UniFirst's and Grace's draft Remedial Design Investigation Report. I have provided these comments in response to your cover letter wherein you indicated that unless you hear from us you would assume that we agree with all of your notes. Should you have any questions regarding these comments please call me.

Sincerely,

Jeffrey T. Lawson, P.G.  
President
